¹Agencies reporting on the hospitalization measure and twelve or more publicly reported measures. Based on data covering the time period July 1, 2012 to June 30, 2012.

²Equal weight was given to "Percentage of patients who had to be admitted to the hospital" and the average rank of the other measures included in the analysis

*Home Health Agency did not have sufficient case volume to report and was not included in the analysis

Disclaimer: The rankings displayed on this web site are presented as percentiles. A ranking in the 100th percentile does not necessarily mean that agencies in that percentile achieved perfect rates on all their measures. It indicates that their rates were better than all other agencies except for those who are also in the 100th percentile. Similarly, an agency with a rank in the 50th percentile did not achieve an average of 50% on their performance measures. They performed better than 50% of all the agencies in the country.
